

The background features a large, light gray circle on the left side. In the top-left corner, there is a yellow semi-circle. In the top-right corner, there is a dark gray semi-circle. In the bottom-left corner, there is a dark gray circle. In the bottom-right corner, there is a yellow circle.

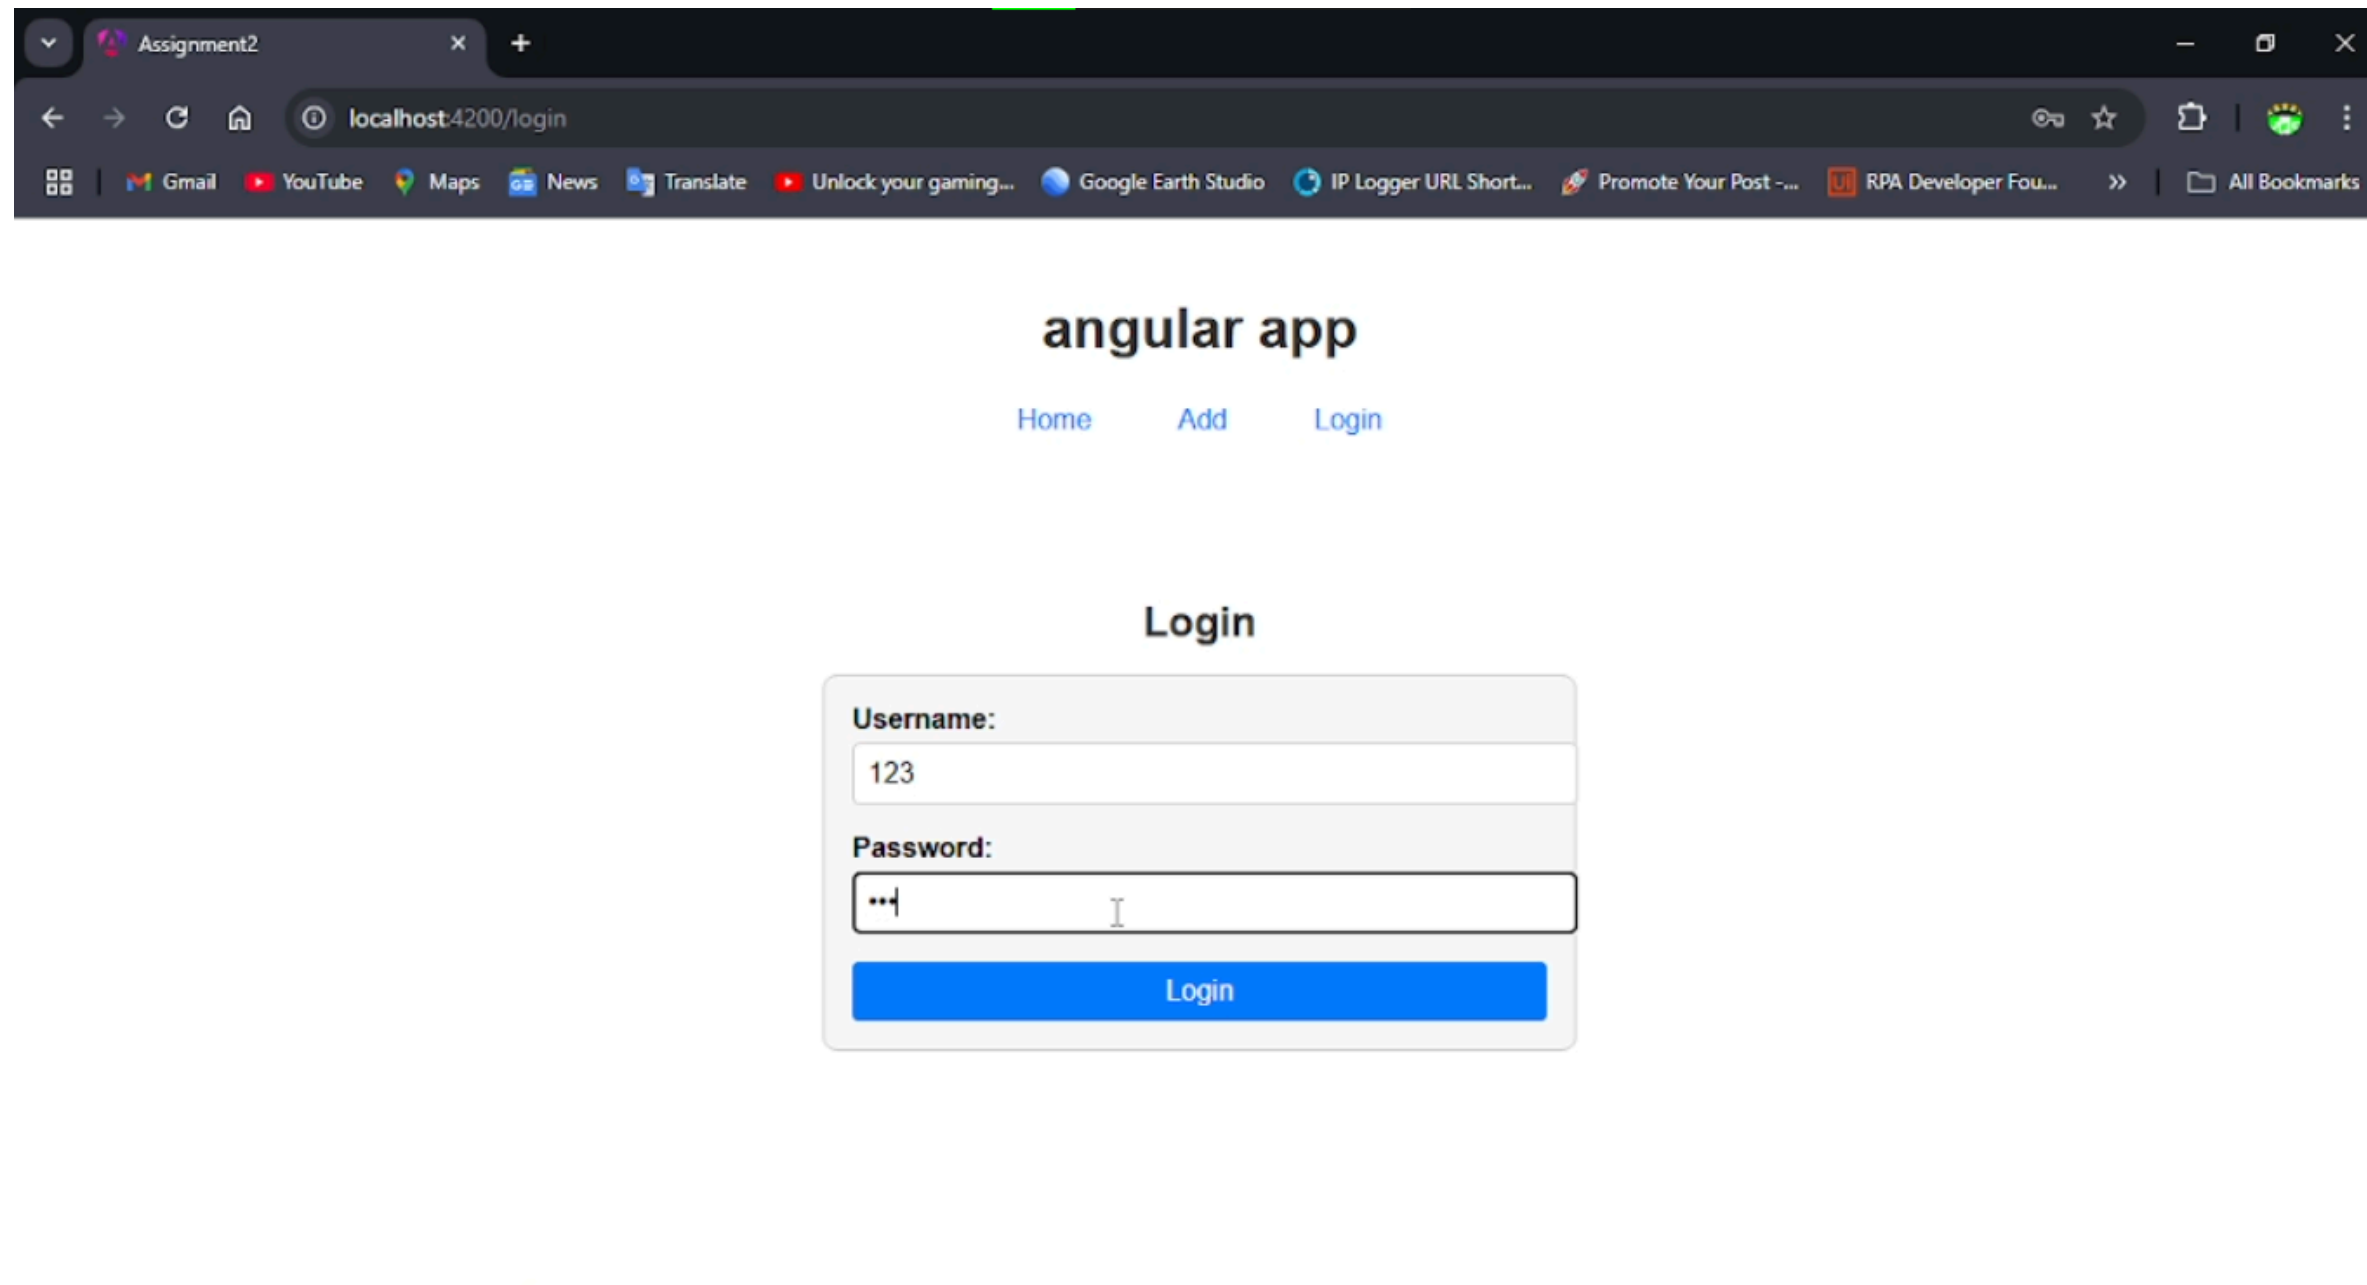

Angular App Presentation

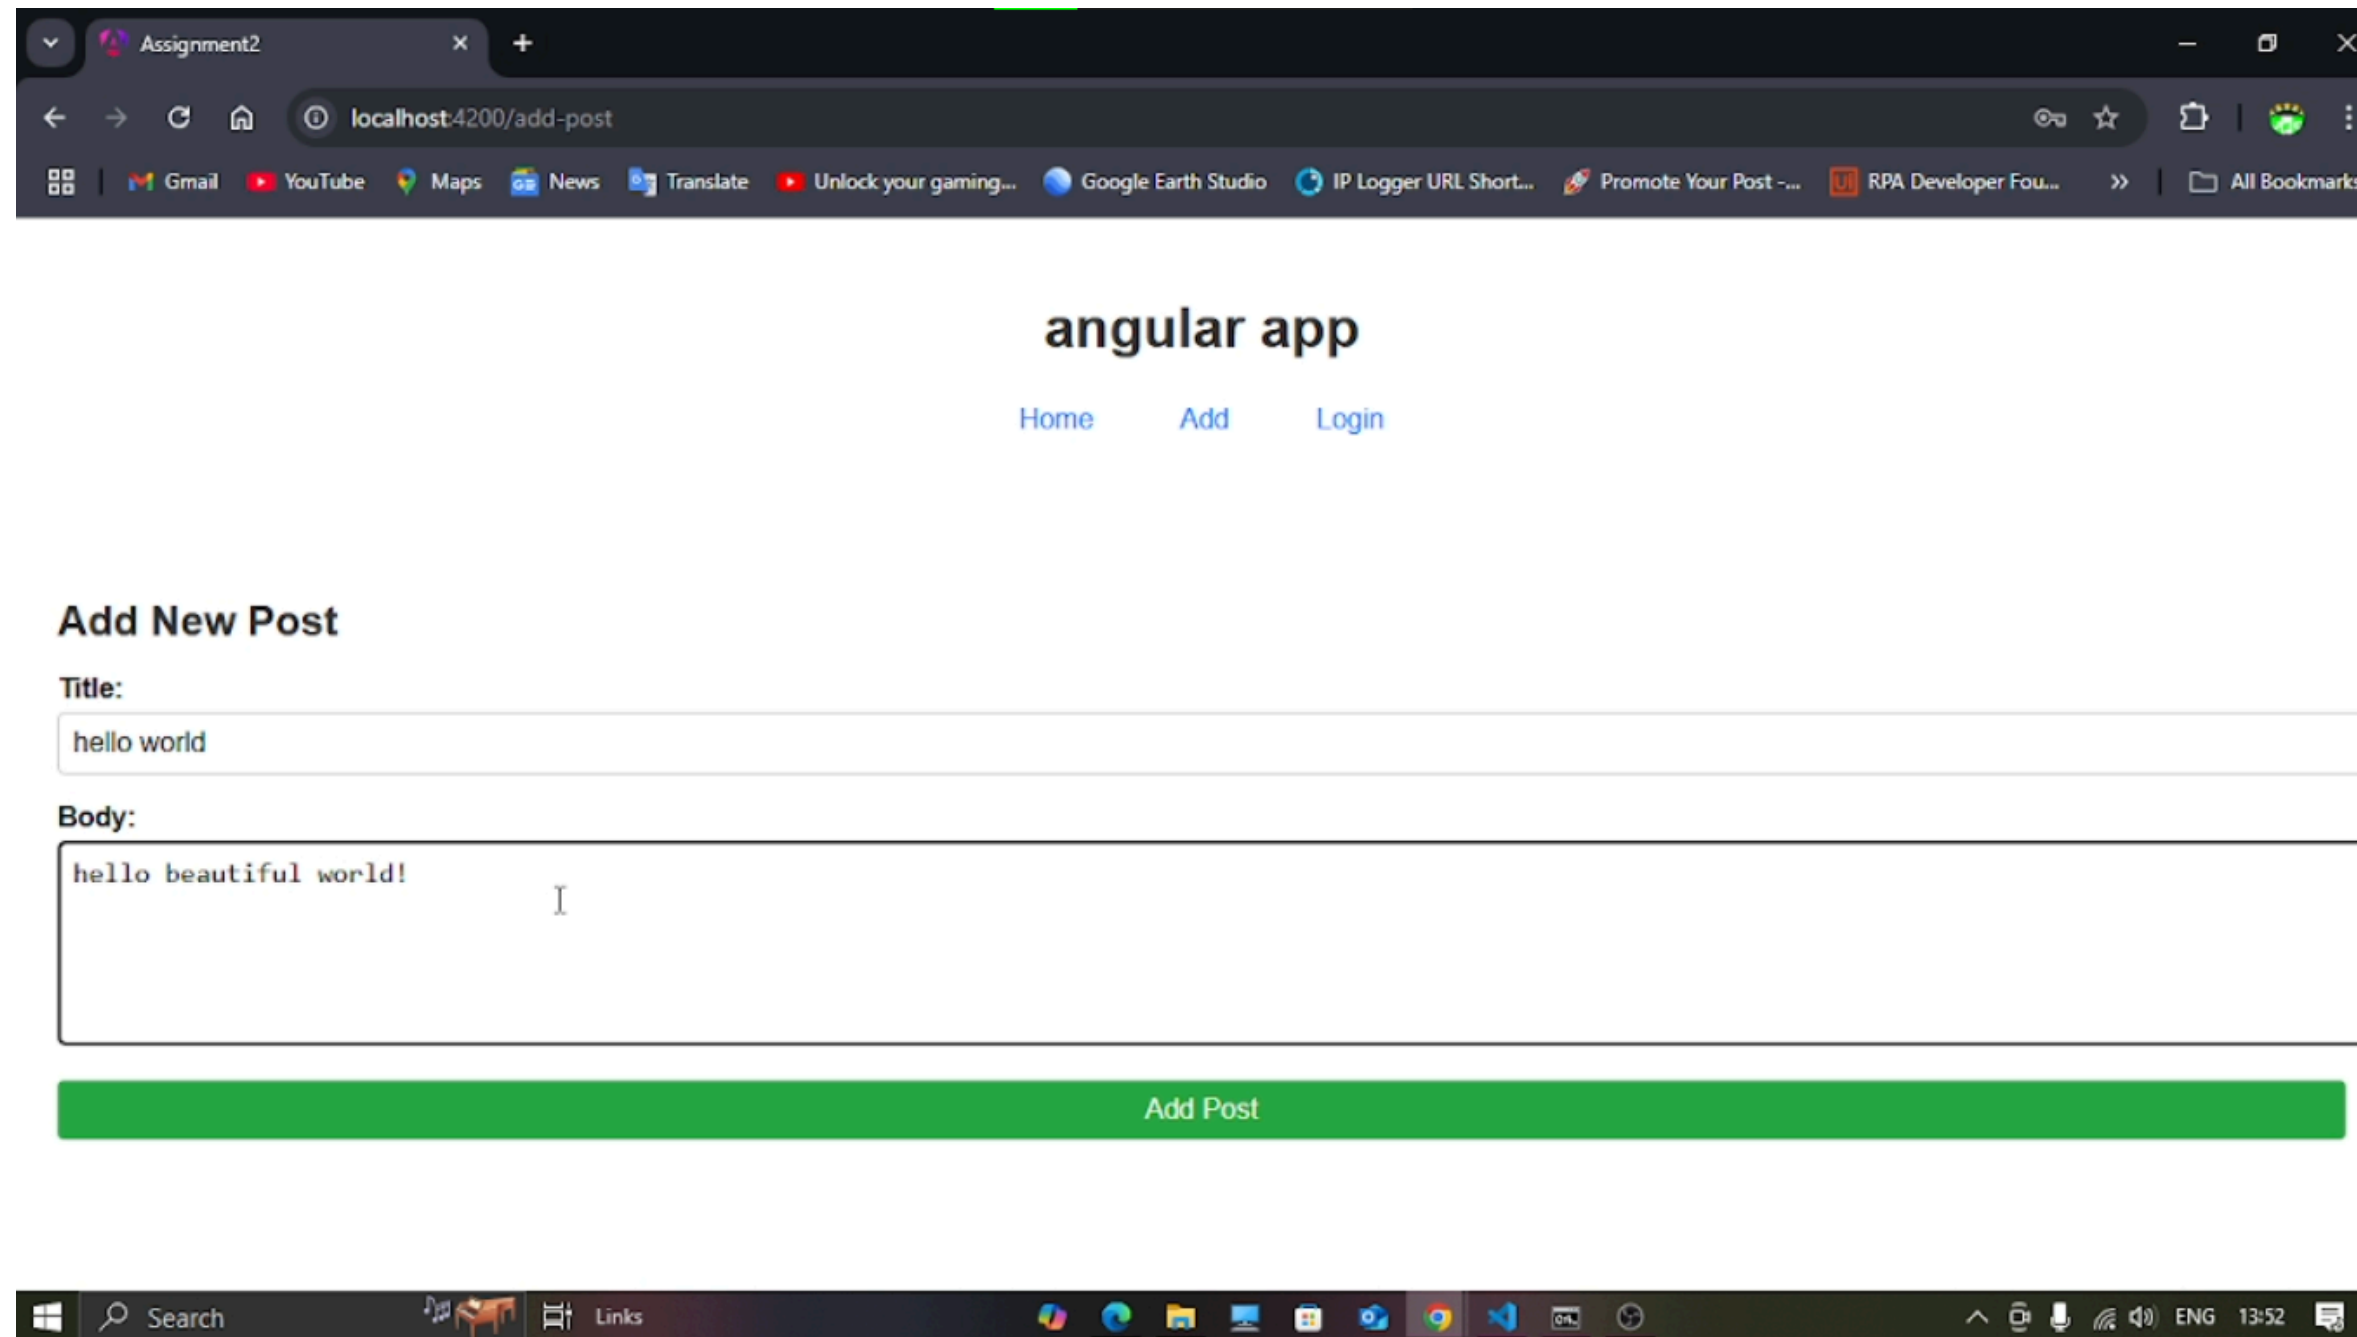

A basic Twitter equivalent web app made using angular

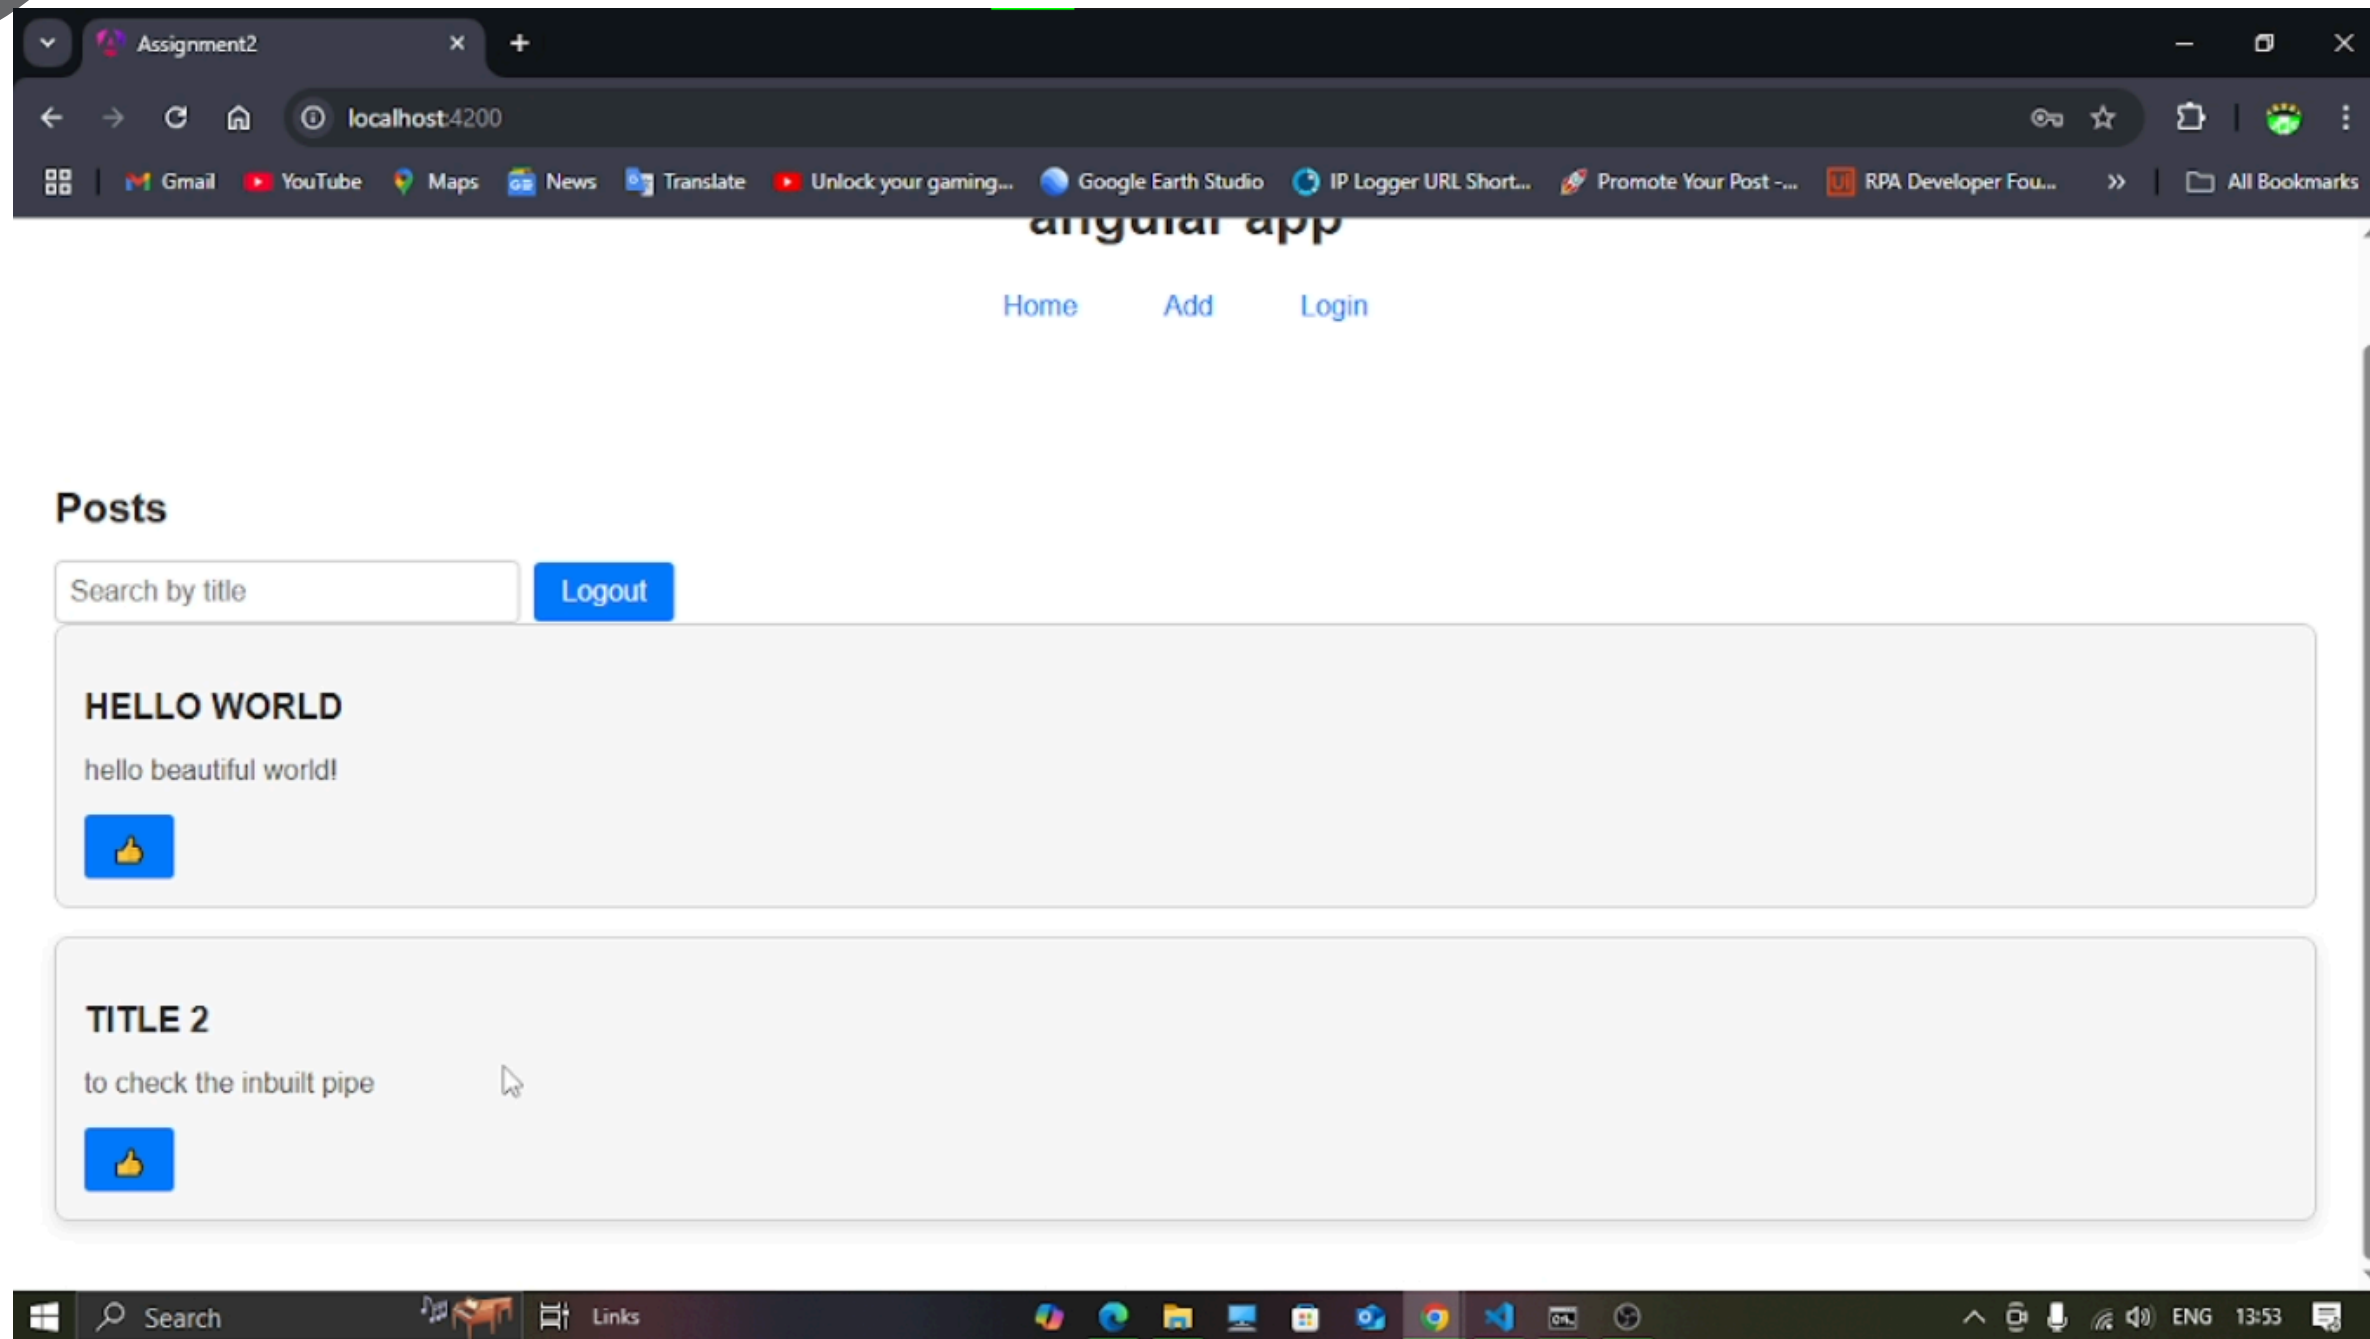

User attempting to make a new post by adding it

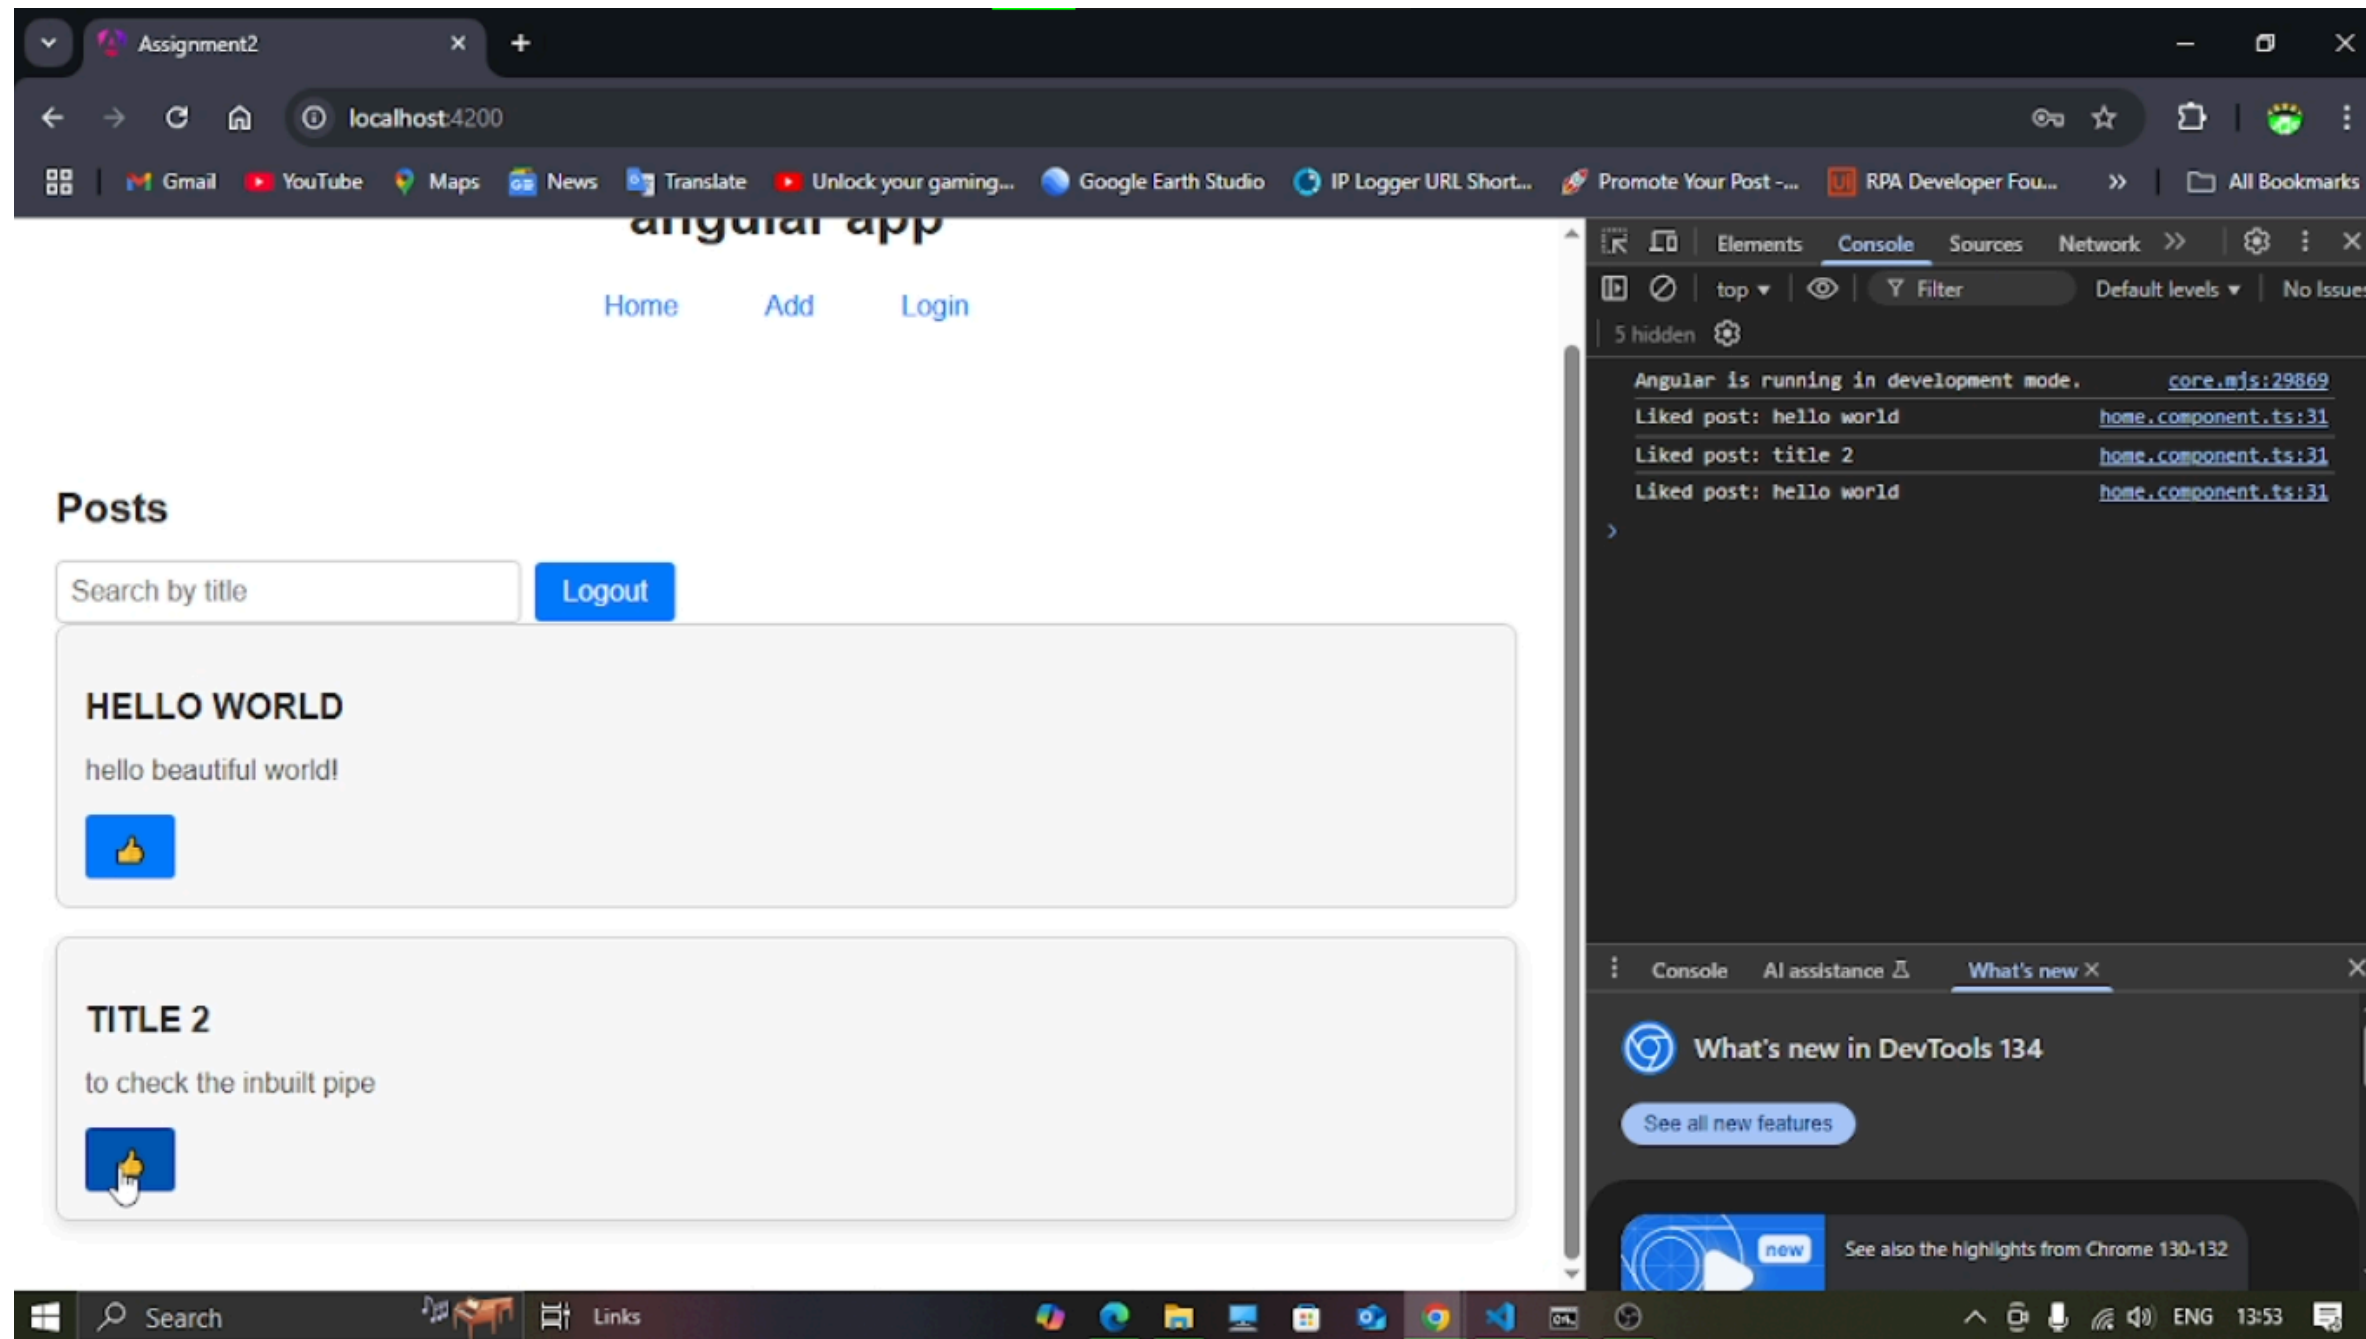

The use of Authguard prevents unknown user to add the post and redirects to the login page

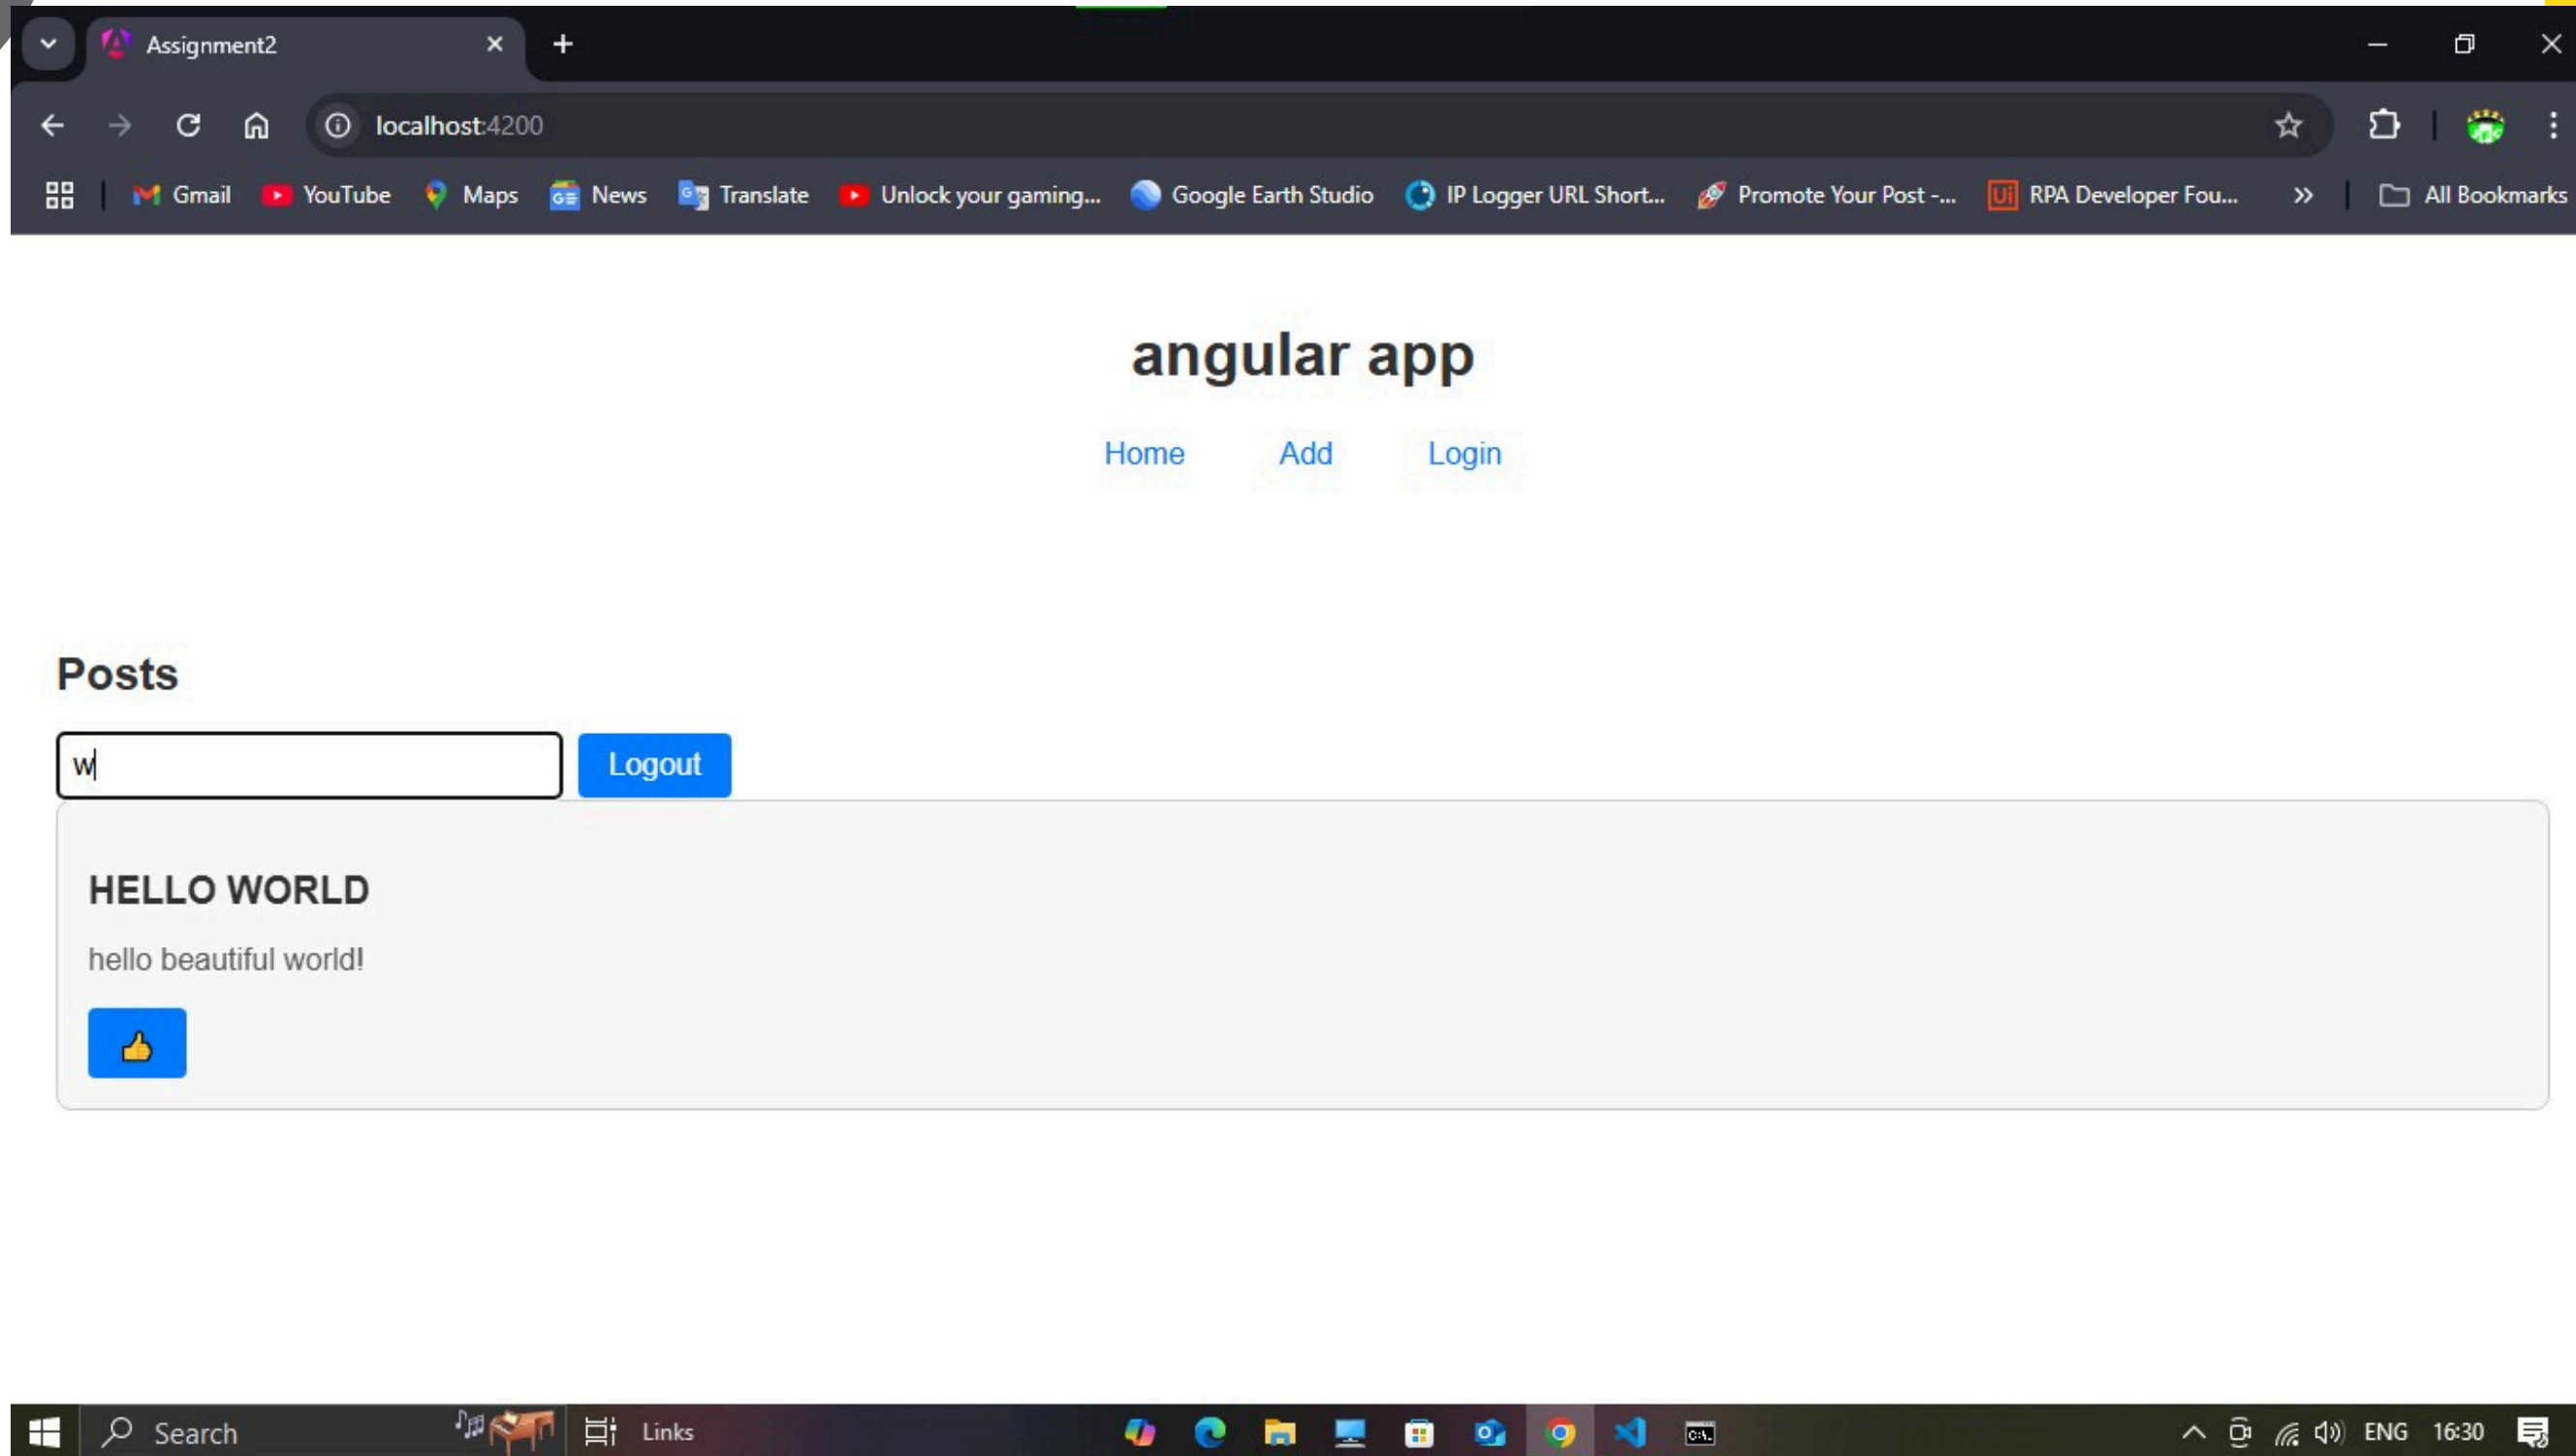

After successful login, the user is eligible to add the post , by entering the title and the body message. after clicking post button @input decorator invokes a call and supply the metadata to the DOM(home page)

After clicking post , a new child component is created , the inbuilt pipe used here on title tag for uppercase alphabets, eventhough the user post a lowercase title it will be converted to upper case

@output decorator is invoked when clicking the like button

The search functionality is a custom pipe
